Justy Ueki Tylor is an unlikely candidate for commander of a space cruiser, no matter what kind of shape it's in. When confronted with a crisis which will certainly mean the death of everyone around him, you'll have a hard time just keeping him awake. And, in the future, crises abound! The entire United Planets Space Force is at war with the Raalgon Empire, and both sides are going to throw their entire resources behind the conflict! His immediate superiors hate him, and gave him this command with the idea that the crew (who have a reputation for going through captains) would rid them of this pest. His crew hates him as well, and many plan to dispose of him as soon as they can. The Raalgon, once they learn who he is, want his head on a pike too. Tylor, though, has a secret weapon ... he has the most disarming persona in the known universe. But, that isn't going to save his bacon once the cannons start to fire ... or is it?

Find out why The Irresponsible Captain Tylor has become the most anticipated title of the year throughout anime fandom! These are the first volumes of a multivolume set.
